## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

## **DETAILED ACTION**

### ***Claims Status***

Claims 40-41, 43-44, 47-53, 55-56, 59-65, 67, 71, 73, 76-81 remain pending and are allowed.

### ***Drawings***

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings submitted on contain improper shading that may affect clarity once reproduced. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. The application has been amended as follows:

### **In the Title**

The title has been amended to read as follows:

--Method and system for music distribution--

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Upon review of the evidence at hand, it is hereby concluded that the evidence obtained and made of record, alone or in combination, neither anticipates, reasonably teaches, nor renders obvious the below noted features of applicant's invention as the noted features amount to more than a predictable use of elements in the prior art. The allowable features are as follows:

“receiving a consumer request for the music selection, wherein the consumer station is further configured to send the consumer request in response to a consumer selection of the music selection without requiring further consumer interaction;

responsive to receiving the consumer request, transmitting the music selection to the intermediate storage medium”

The most felicitous prior art made of record includes previously cited Wiser and Hamada. Wiser was previously cited as teaching “receiving a consumer request for the music selection” and “responsive to receiving the consumer request, transmitting the music selection to the intermediate storage medium”. Though Wiser is designed to allow a user to preview a music selection and subsequently purchase that selection, Wiser teaches where the initial preview of the music selection is followed by a purchase request (i.e. *further consumer action*). More specifically, once a preview is completed, the user must provide additional input in order to effect storage of the music selection onto a medium.

Moreover, such storage as noted above in Wiser represents the storage of the music selection in a permanent storage medium, rather than an intermediate medium as claimed. In fact, contrary to previous assertions, Wiser does not teach “responsive to receiving the consumer request, transmitting the music selection to the intermediate storage medium”. For example, previously cited col. 12 lines 12-19 discuss the playing of a preview and the *subsequent* recording of *purchased* media to external storage. There is no mention of the preview itself being stored (only permanent storage of purchased media in an external

Art Unit: 3625

medium). Further, col. 18 lines 11-14 discloses the storage of a "media voucher". Though the storage of the media voucher is temporary, this is not analogous to the actual storage of the media selection in intermediate media (note: the media voucher merely represents a voucher providing permissions for access). Lastly, col. 13 lines 57-67, col. 18 lines 43-51, and col. 18 line 63-col. 19 line 10 discuss the real time *streaming* of the preview. Such aspects of "streaming" are not analogous to the storage of a media selection in an intermediate storage medium. To the contrary, streaming involves the continuous transfer of data so that it may be processed as a steady stream of data, rather than requiring the storage (e.g. such as by downloading) of that data. In other words, the streaming aspect of Wiser is not analogous to the transmission of the media selection to an intermediate storage medium.

Likewise, Hamada only shows permanent storage upon providing a purchase request. Though disclosing the ability to "test-listen" to media selections prior to purchase, such functionality is akin to the preview/streaming functionality of Wiser (see col. 4 lines 50-55, col. 7 lines 31-40). Hamada, then, does not cure the deficiencies as noted above.

Moreover, even assuming *arguendo* that the features of the claims exist individually, the combination of features as claimed would not have been obvious to one of ordinary skill in the art because any combination of the evidence obtained to reach the combination of features as claimed would require a substantial reconstruction of Applicant's claimed invention relying on improper hindsight bias.

It is hereby asserted by the Examiner that, in light of the above and in further deliberation over all of the evidence at hand, that the claims are allowable as the evidence at hand does not anticipate the claims and does not render obvious any further modification of the references to a person of ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
